

Release Notes

Optisoft.NET v1.2.21251.1

6th September 2021

Issues

Patients Recall

- Addressed an issue which was preventing contact lens Rx's from being saved introduced in the previous version (1.2.21243.2)

Clinical Records

- Addressed an issue that prevented an Rx page with visual acuity fields could not be saved as it was expecting a sphere value.

Spectacles

- Addressed an issue that was causing the products to be cleared if the user edited the frame.
- Addressed an issue with transposing the Rx.

Contact Lenses

- Addressed an issue with an error message relating to NULL values.

Templates

- Addressed an issue that meant that the user was unable to editing or create documents after the text control had previously errored on opening a document.

Changes

Spectacles

- Added the ability to create Frame Only dispenses.

Templates

- Added specific Branch Email Address merge codes for Recall, Appointment, Spectacles and Contact Lenses documents.

Maintenance / System Wide

- Made a change to the database with regards to improving the performance of creating and opening Events in Appointments
