

Release Notes

Optisoft.NET v1.2.22035.2

7th February 2022

Issues

Patients Recall

- Addressed an issue with the patient's name being displayed incorrectly.
- Addressed an issue that could mean that multiple entries for the same patient were being displayed in the Run list for an historical recall.
- Resolved an issue where the ToDo list was not immediately updating if the user is changed by logging in from the lock screen.
- Creating a ToDo from a template now correctly assigns the User selections.
- Addressed an issue with the sort order on the Visit Selection dialog when printing documents with Clinical Records merge codes in.

Clinical Records

- Addressed an issue when tabbing from the Cyl field skipping over the Axis field.
- Resolved an issue with the keypad size scaling incorrectly when swapping through Pages.
- Resolved an issue that was incorrectly copying all notes from a pathway into a single page's notes.

Cash

- Addressed an issue with Till Reconciliation that was incorrectly only displaying transaction for the active user.

Spectacles

- Addressed an issue with Lens Extras not being copied correctly when clicking the Copy Dispense button.
- Addressed an issue with the price name not displaying on the multi-price selection dialog.

Contact Lenses

- Deleted dispenses will no longer show up in the list of dispenses in the Contact Lens module.
- New dispenses will no longer save if the size and/or option are not specified if the selected lens has a size and/or option associated with it.
- Addressed an issue that was preventing the price of free-typed items in a dispense from being saved correctly.
- Resolved an issue where returning from a print preview in a dispense was going to the list of dispenses rather than the dispense.
- Addressed an issue when there are multiple products with similar names preventing details from propagating correctly.
- The prescription dropdown box will now correctly be disabled in line with the equivalent drop down in Spectacles module.

Release Notes

EGOS

- Resolved an issue with the GOS3 where the near sphere value was being submitted to the PCSE system rather than the Add value.
- Addressed an issue with the 'Select All' option in Batch Signing.

Templates

- Addressed an issue with the Cash receipt template not being displayed in the list of templates.
- Addressed an issue where deleted Contact Types were being included in the list of merge fields when creating a document.

Maintenance / System Wide

- Addressed an issue when copying a User was not correctly copying all the security selections for the select branch.

Release Notes

Changes

Patients Recall

- Made a change to disabled the Activity Pane when the Active Patient list is disabled to prevent the user from inadvertently changing the patient.
- Pressing New on the Contact Lens tab will start a new contact lens dispense rather than taking the user to the Contact Lens module.
- Added a new tab to display any GOS submissions for a patient that have been submitted through the full EGOS integration module.
- Double clicking on an existing dispense on the Contact Lenses tab will load the dispense for editing/viewing.
- Added a Surgery Search button to allow easier selection of GP practices.

Email / SMS

- Changed the name of the 'Active' status to 'Queued' for clarity.
- Added a coloured highlight to the queue list boxes to indicate the items' current status.

Appointments

- Notifications can no longer be assigned when a patient does not have a valid processing method for each step of the notification.
- A confirmation dialog will now be displayed when attempting to book an appointment for a staff member that is not scheduled in to the selected appointment slot.

Clinical Records

- Made a change to, when in a visit, no longer restrict the list of drawings to that particular visit.
- Changed the order of tabs in Contact Lens dispensing to mirror those in the Spectacles module for consistency.
- Keyboard shortcuts have been added to Clinical Records to change the page
 - (Ctrl + > or Ctrl + (Right Arrow) for next page)
 - (Ctrl + < or Ctrl + (Left Arrow) for previous page)
- Creating or editing a Drawing will automatically save the Visit.

Cash

- Added a popup to display the patient details when the user hovers over the patient's name on the Cash screen.

Spectacles

- Made a change to prevent the Voucher value being editable once a dispense has been Confirmed.
- Made changes to improve performance of dispensing, especially for dispenses that have already been confirmed.
- Made a change to SDC to allow calculations to be worked out from percentages.

Release Notes

Contact Lenses

- For a new dispense, if the selected prescription has a product associated with it these will be automatically selected on the Dispense tab.

Stock

- Made a change to prevent duplicate items for the same Supplier.

EGOS

- Voucher prices for the GOS3 now updated automatically.
- Added validation to EGOS statuses.

Reports

- Made a change to the Day Sheet report to display the name of the patient against any Deposit amounts shown on the report.
- Made a change to the Stock Take report to group transactions by product, model and option.

Maintenance / System Wide

- Made a change to the Notes screens so that selecting a preprepared note from the dropdown appends to the open note rather than replacing it.
- Made a change so that selecting an existing note whilst entering a new note will now automatically save the new note.
- Ribbon menu has been updated to work correctly with Windows 11's new visual style.
- On the Print Preview screen, the user can now rename the document that will be saved to the patient's document tab before printing.
