

# Release Notes

Optisoft.NET v1.2.22039.5

8th February 2022

## Issues

### Appointments

- Addressed an issue that was incorrectly informing the user that the staff member is not scheduled into the diary when booking an appointment.

### Spectacles

- Addressed an issue that was preventing the saving or dispense when using a partially free-typed product.
- Resolved an issue that was preventing the correct price from being entered for partially free-typed products on a dispense.

### Reports

- Resolved an issue which was preventing the Cash Day Sheet from opening.
