

# Release Notes

Optisoft.NET v1.2.22339.3

5th Dec 2022

## Issues

### Patients Recall

- Resolved an issue that could cause the tabs on the Patient screen to not update correctly when changing patients.
- Addressed an issue that could cause mobile phone numbers validations outside of the UK and Eire not highlighting issues with entered data.

### Appointments

- Addressed an issue that could result in an error message when opening an Event in the Appointment diary.
- Addressed an issue that meant that the options on the right click menu of a selected appointment were not correctly passing the patient details through to the appropriate module.
- Addressed slow loading of saved appointments from the appointment diary.

### Clinical Records

- Addressed an issue that could cause slow loading of the previous visit notes in the Activity pane.

### Stock

- Addressed an issue that could cause the Stock module to load slowly.

### EGOS

- Resolved an issue that could result in an error message when the status of submissions was changed on the main EGOS screen.

### Templates

- Resolved an error message that was being displayed when editing cash receipt templates.
- Resolved an issue that was preventing the user creating a copy of receipt templates.
- Addressed an issue that prevented the Merge Codes button on the toolbar activating when opening a template to edit using the right click menu.
- Resolved an issue with adding a new blank line to email templates.
- Addressed an issue when adding images to emails or email headers and footers that meant that the image was not being correctly relocated to be used in sent emails.

# Release Notes

## Changes

### Patients Recall

- Made a change to add a column to display dispense notes on the Spectacles tab.
- Made a change so that the Previous System user created by the data transfer was not showing in the list of Messenger users.

### EGOS

- Made a change to the GOS 1 patient eligibility label to bring it in line with the recent change to the PCSE portal wording.

### Reports

- Added the patient's reference number to the Appointment Schedule report.
